Model G 176 Grade Control

The Grad-Line G 176 electronic controller offers the most advanced automatic control of paver hydraulic leveling systems for the asphalt and paving contractor. Its precision control of elevation assures on-grade asphalt mat spreads and smooth, precise concrete curb and gutter pours. The G 176 Grade Control units are available in two series for job-matched profitability. The G 176 electronics are modularized for easy service and exchange.

P/N: G-048636

Model S 276 Slope Control

The Grad-Line S 276 electronic controller offers the most advanced automatic control of paver electro-hydraulic leveling systems for the asphalt and paving contractor. Its precision control of slope assures table-smooth asphalt mat spreads and smooth, precise concrete curb and gutter pours. The S 276 electronics are modularized for easy service and exchange.
