

## Mini-Line<sup>®</sup> mechanical grade control system (without control Handset)

The Mini-Line<sup>®</sup> mechanical grade control system automatically regulates and maintains the tow-point to the desired grade while paving. End result is a smooth and accurate mat thickness. The system plugs directly on any paver.

### Features

- Easy installation
- Operate on any paver model
- Solid state electronics
- Operating voltage 10 - 30Vdc
- Protected against reverse polarity and short circuit
- Pair of strong radial ball bearings for optimum rotational performances
- Resistant aluminium house sealed to IP44 standard
- Quiescent current 90mA
- Dimension 60mm x 115mm x 60mm
- 63mm mounting boss
- Fully serviceable and repairable

The system includes

Kit description	Part number
Mini-Line <sup>®</sup> G198 controller/sensor with ON/stand-by switch and a 6-pin contact bayonet receptacle	S-50138
Tube assy	S-50104
Arm	S-50103
Counter-balance	S-50105
Shoe	S-50106
Coiled-cable with a 6-socket contact bayonet plug and a 10-socket contact threaded plug	S-50101
Mini-Line <sup>®</sup> Grade Control kit	S-50160

*Note: Coiled-cable is available in standard length of 1.5m and 4.0m*
